SUMMARY

Energetic system administrator with quality experience in maintaining, supporting and managing Linux servers, seeking to use scripting and problem-solving skills to automate and improve the performance of the infrastructures.

INTERNATIONAL CERTIFICATIONS

- **Red Hat Certified System Administrator in RHEL 10: EXAM Schedule**
- **Linux Foundation Certificate Intro to Linux**
- **Linux Foundation Certificate Opentofu**
- **Linux Foundation Certificate Intro to GitOps**
- **OCI Certified DevOps Professional**

WORK EXPERIENCE:

Organization: Neural Arc Inc (Cloud DevOps Intern)
Designation: Cloud DevOps Trainee
Location: Pune
Duration: Nov 2025 to Feb 2026
Scope of Work: Monitored cloud infrastructure, application and system alerts, and performed basic troubleshooting of issues in lower environments. Assisted in setting up and maintaining CI/CD pipelines for application deployment in lower environments. Created and configured servers/virtual machines in lower environments based on project requirements. Assisted in deployment activities, application configuration, log monitoring, and validation of builds and deployments. Worked with cloud resources and supported routine infrastructure maintenance activities under the guidance of senior DevOps engineers. Performed basic troubleshooting of deployment failures, server connectivity, application issues, and pipeline errors. Assisted in managing environment configurations, access permissions, and routine operational activities. Monitored system health and application performance and escalated critical issues to senior team members. Maintained basic documentation of deployments, infrastructure changes, issues, and troubleshooting activities while following organizational security and operational procedures.

Roles and Responsibilities:

- Configuring, monitoring and maintaining multiple Redhat servers.
- Monitored application, server and infrastructure alerts and performed initial troubleshooting.
- Assisted in configuring and maintaining servers in lower environments.
- Created and configured servers/VMs in lower environments as per project requirements.
- Built and maintained CI/CD pipelines for application deployment in lower environments
- Assisted in application deployments and performed post-deployment verification.
- Troubleshot basic server, application and connectivity issues and escalated critical issues when required.
- Maintained deployment, configuration and troubleshooting documentation.
